## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Objections***

2. Claims 3-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only--, and/or, --cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 3-8 have not been further treated on the merits.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Seban WO 01/72167.  
Seban '167 teaches a container for make-up comprising an inner vessel (2a), an outer mantle (5) extending lower than the inner vessel and a closure (4) formed in one piece with the container.
5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Sharkan et al. US 5,209,184.  
Sharkan '184 teaches a pet travel bowl comprising an inner vessel (22), an outer mantle (24) extending lower than the inner vessel. Examiner notes that while there is hook and loop fastener (36) disposed on the bottom of the bowl, the actual bowl bottom surface (22b) does not extend as far as the bottom edge of the outer mantle (24).

Examiner notes the container is capable of being used in the intended manner, i.e. it is capable of holding cosmetic and pharmaceutical creams. It has been held that a recitation with respect to the

Art Unit: 3781

manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647 (1987).

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Friedman US 1,852,455.

Friedman '455 teaches a container for make-up comprising an inner vessel (3), an outer mantle (2) extending lower than the inner vessel.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sharkan et al. US 5,209,184.

Sharkan '184 fails to teach the cover molded in one piece with the container.

Examiner notes it is well known to form tethered closures integral with their containers motivated by the benefit of preventing separation of the cap and container, should the snap connection such as that in Sharkan '184 come undone.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the closure cap of Sharkan '184, forming it integral with the container, motivated by the benefit of preventing separation of the cap and container, should the snap connection come undone, because it has been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art. *Howard v. Detroit Stove Works*, 150 U.S. 164 (1893).
